Other Documentation Guides   ⌄

The status of all tools and libraries is in this table:

Tool	Description	Version	Status	Demeter accessible
blockfrost-backend-ryo	API service to fetch data from the Vector chain	v2.1.2	✅	✅
blockfrost-js	SDK to interact with a Blockfrost instance	v5.4.0	✅	–
blockfrost-utils	Typescript utils for Blockfrost	v2.8.0	✅	–
vector-serialization-lib-nodejs	Serialization & deserialization of data structures used in Vector	v11.5.0	✅	–
vector-serialization-lib-browser	Serialization & deserialization of data structures used in Vector	–	🚧	–
vector-db-sync	PostgreSQL instance that contains the state of Vector	v13.4.0.0	✅	✅
vector-node	Software capable of running as a core block producer, as a relay or as a local entry-point to the network.	v8.9.3	✅	✅

Tool	Description	Version	Status	Demeter accessible
vector-submit-api	Software capable of submiting transactions into Vector.	v3.2.2	✅	🚧
vector-cli	Software capable of building and submitting transactions into Vector.	v8.20.3.0	✅	-
vector-ledger	Set of Haskell libraries used in vector-node, vector-cli, vector-db-sync, ...	-	✅	-
kupo	Indexer	v2.9.0	🚧	🚧
ogmios	**HTTP / WebSocket** API that enables applications to interact with a local cardano-node.	v6.2.0	✅	✅
vector-js-sdk	A suite of TypeScript packages suitable for both Node.js and browser-based development.	-	✅	-
blaze	JS library to build Cardano transactions and off-chain code for contracts.	-	✅	-
eternl	Wallet	v1.12.16.0	✅	
pallas	Rust lib collection that implements Cardano logic	-	-	-
oura	Pipeline that connects to the tip of a Cardano node	-	-	-
